Back Pressure Valve
Cameron® Style “H & HM”
Type

- Manifolds
- Gate Valves
- Back Pressure Valves
- Choke and Control Panels

Meets or Exceeds API 6A Standards & NACE MR-01-75

Internal Parts are Completely Interchangeable with CIW

10422 W. Gulf Bank Rd. • Houston, Texas 77040

Cameron® Type “H & HM”
Back Pressure Valve

• The Cameron type “H” back pressure valve safely seals tubing pressure to 20,000 psi. BPV are used during the inflation of Christmas Trees, BOP removal and to prevent backflow of fluid into tubing.

• Back pressure valves reduce downtime and operating cost by allowing for repairs without killing the well.

  • Sizes available from 1-1/4” to 6-5/15” for BPV + TWC

• The “H” Two-Way style Check Valve can be installed in the tubing hanger for testing up to 15,000 psi.

  • Material options of 4130, 17-4 and Inconel.

* We also provide installation, removal tools and test plugs*
